**GAUSSIN announces the firm order of 24 ATM® FULL ELEC
by its distributor BLYYD**

GAUSSIN MANUGISTIQUE (EURONEXT GROWTH FR0010342329) has announced the signing of a contract for the firm order of 24 ATM® FULL ELEC by its distributor BLYYD. The vehicles are intended for leading players in the mass distribution and logistics sectors. Deliveries will start in January 2018 to the pace of two vehicles per month.

ATM FULL ELEC

The vehicle was awarded the Innovation Prize at the Solutrans 2017 Fair.

On last 21 November, the ATM FULL ELEC was awarded the Sustainable Development Innovation Prize in the manufacturers' category of the Solutrans 2017 Innovation Trophies. The jury was impressed by the total absence of CO² emissions from this fully electric vehicle, as well as the very low noise pollution to users, site employees, and other residents of the area.

The quick commercial breakthrough of the ATM FULL ELEC

This new order for 24 ATM FULL ELEC occurs following the plant reception on 16 November of the first 2 ATM FULL ELEC ordered by BLYYD for the CARREFOUR SUPPLY CHAIN company. Six other ATM FULL ELEC from the same order placed in May 2017 should be delivered by the end of 2017 and a ninth vehicle is scheduled for delivery early 2018.

An easy-to-handle, eco-friendly vehicle

The ATM has a number of advantages compared to conventional road vehicles:

- Reduced size, compact machine
- Exceptional manoeuvrability
- FULL ELEC: ECO FRIENDLY, no CO2 emissions
- No noise pollution
- Total safety and visibility
- Quick commissioning and safe manoeuvres
- Low maintenance

Equipped with two 60 kWh lithium ion batteries powering two 50 kW motors, the ATM FULL ELEC provides 24 hours of use per charge. The vehicle has a towing capacity of 44 tons, with a maximum speed of 25 km/h. The ATM FULL ELEC technology is patented and its design is protected.

Upcoming events

CES in Las Vegas from 9 to 12 January 2018

About Gaussin

GAUSSIN MANUGISTIQUE® is specialised in the auditing of handling processes and the development of wheeled handling systems used to install and transport heavy, bulky or fragile loads. With more than 50,000 handling vehicles worldwide, GAUSSIN Manugistique boasts a strong reputation on four fast-expanding markets: Energy, Transport, the Environment, and Raw Materials.
