# Automotive Airport Transporter

Zero noise, Zero carbon emissions, Zero odors

## CONSUMPTION

- Low energy consumption thanks to effective power management and braking regeneration system

## DRIVING CABIN

- FOPS ROPS, low position driving cabin
- Greater maneuverability and safe access

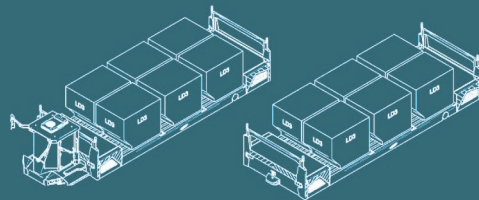

## CHARGING

- Automatic Charging
- Fast Charge or SWAP
- 99% availability

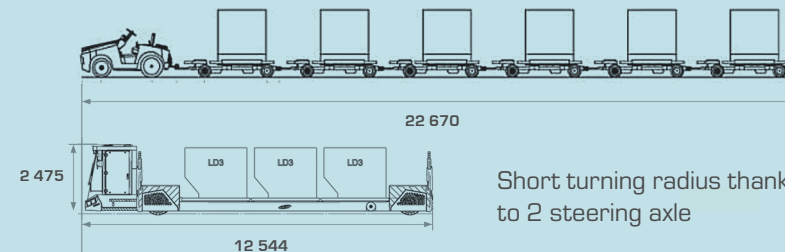

## UNIT LOAD DEVICE

- Scalable 4 to 6 ULDs (paletts or containers)

## Advantages

- All type of ULDs (paletts and containers).
- No battery sensitivity to temperature variation. Resist to extremely low and high temperature.
- Fully automated loading & unloading of ULDs.
- Ready for Semi and Full Automation. Easy conversion to semi or fully autonomous through plug-in kit.
- 50% convoy lenght reduction compared to traditional tug and dollies system.
- 3 times faster than tag & dollies.
- 8 % slope fully loaded.
- Ability to transport ULDs or PMC
- Payload Tandem or Tridem: 15 T

Short turning radius thanks to 2 steering axle

Chassis height	508 mm compatible with any airport handling system
Width	3 300 mm
Speed empty/loaded	Up to 80 km/h
Payload Tandem	6,4T
Payload Tridem	9,6T
